

Title

Desktop AI-Powered Payroll Management System with Salary Prediction

Project Overview

Desktop payroll system with AI salary prediction.

Objectives

Automate payroll, attendance, reports, salary prediction.

Modules

Login, Employee, Attendance, Payroll, Prediction, Reports.

Technology

Python, Tkinter, SQLite, Pandas, Scikit-learn.

AI Model

Regression model predicts future salaries.

Database

Employee, Attendance, Payroll tables.

Features

Salary slips, PDF reports, deductions, tax.

Results

Accurate payroll and prediction with user-friendly interface.

Conclusion

Efficient payroll management with AI support.
